Welcome to VMware vRealize® Automation™ documentation. Learn how you can provide a secure portal where authorized administrators, developers, or business users can request new IT services. Manage your cloud and IT resources, while ensuring compliance with business policies.

VMware vRealize Automation Documentation

Just before VMworld 2019 in Barcelona, we released vRealize Automation (vRA) 8.0 which provided the most significant update to the product since it was acquired in 2012. It introduces a new modern architecture, welcomes the multi-cloud era and dramatically revamps blueprint canvas to embrace the concept of infrastructure-as-code.

Learning VMware vRealize Automation [Book]

vRealize Automation provides the ability to create models of services. These services are abstracted from each other within a single solution. For example, application services (PaaS) are abstracted from infrastructure services (IaaS), which are further abstracted from resource pools.
